

Fitzroy Readers

The Fitzroy Method is the complete literacy program. Starting with the first letters, it builds to total reading mastery. The approach is logical, step-by-step and easy to follow, and it uses a variety of teaching tools to guarantee both rapid and enjoyable reading progress.

The wonderful thing about a phonics literacy programme is that as soon as you have learnt the 26 basic letter sounds you can already start to read and write thousands of English words - even ones you have never seen before.

The main thing to recommend the Fitzroy Method over other phonics programs is that it is systematic. This means that your child will always feel on top of the reading and writing learning process, since every step of the way is carefully calibrated. The result of this is that every Reader always appears easy to read. This creates a series of success experiences that boost confidence and encourage your child to continue learning.

Just as importantly, the systematic approach guarantees that your child - even if not blessed with huge amounts of reading and writing talent - will nevertheless learn to read and write fluently.
