

Jolly Phonics

Jolly Phonics is a thorough foundation for reading & writing. It uses the synthetic phonics method of teaching the letter

sounds in a way that is fun & multi-sensory. Children learn how to use the letter sounds to read & write words.

Parental support is important to all children, as they benefit from plenty of praise & encouragement whilst learning. You should be guided by the pace at which your child wants to go. Not all children find it easy to learn & blend sounds. It is important to remember that this is not because they are unintelligent, but because they have a poor memory for symbols & words. Extra practice will lead to fluency in reading & help your child manage at school.

Independent studies find that, after one year's teaching, children taught with Jolly Phonics have an average reading age around 12 months ahead of their actual age. Their spelling age is usually slightly further ahead.

Jolly Phonics is multisensory & has been developed so the adult can use it confidently & easily, even at the end of an exhausting day!

Call into our showroom & our experienced staff will be happy to assist you.
